Severe Weather Outlook Friday, April 29, 2022

Last Updated: Apr 29 2022 1249 AM CDT
Valid Until: Apr 30 2022 0700 AM CDT

Hazardous Weather

Extremely dry conditions and breezy winds will create the potential for a risk of wildfires today across the Panhandles. The strongest winds are expected across the northern combined Panhandles.

Maximum wind gusts today will range from 35-40 mph in the SE TX Panhandle to 50-55 mph for portions of the northern Panhandles. Blowing dust may also reduce visibility at times. Use caution if traveling today.

Hazardous Weather

A Red Flag Warning is in effect through this evening for Southeast New Mexico and most of West Texas. Please avoid outdoor burning of any kind and properly dispose of cigarettes.

There is a slight risk of severe storms Sunday afternoon and evening, mainly over the Western Low Rolling Plains. Any severe storms that do develop will be accompanied by large hail and/or damaging winds. Be situationally aware!

Hazardous Weather

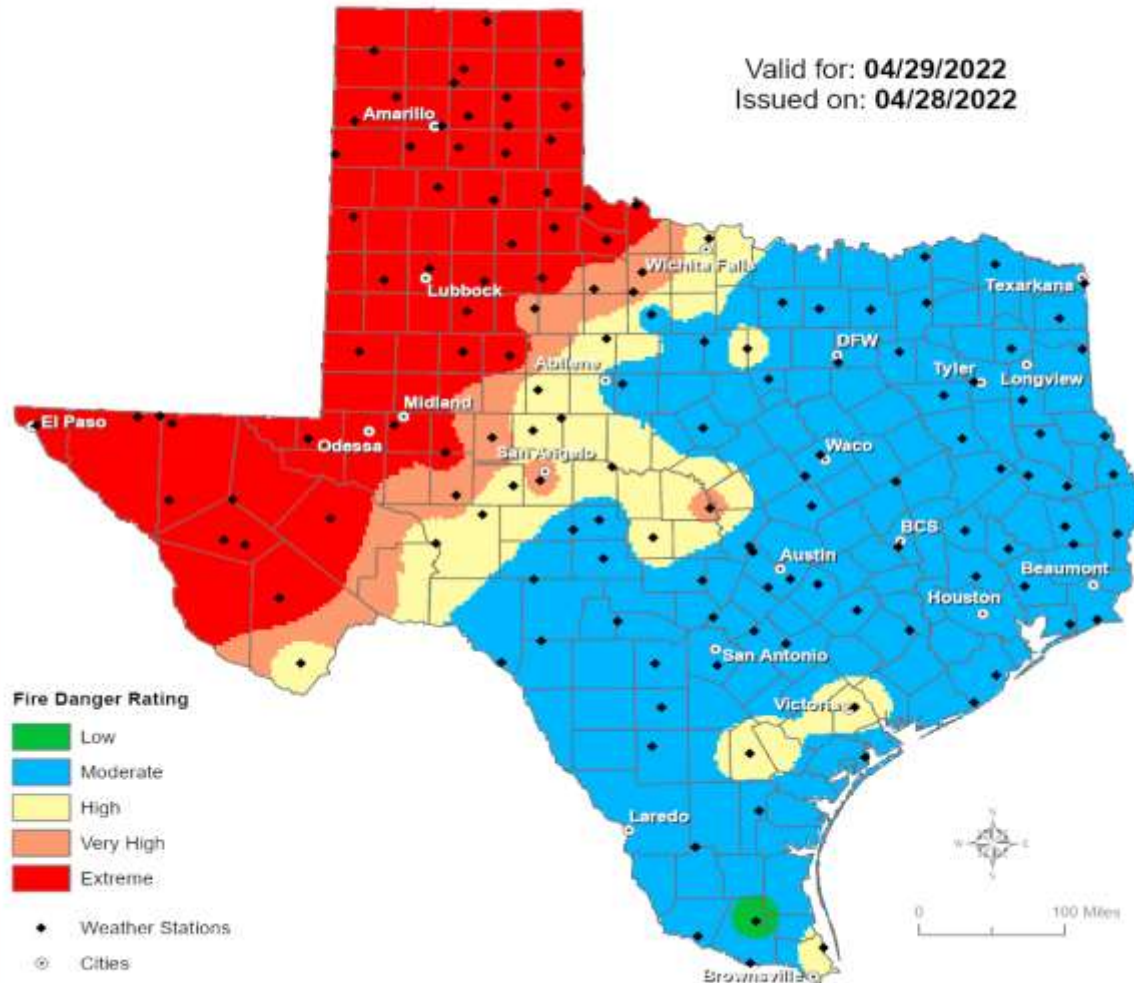

A Red Flag Warning is in effect today from 10 AM until 9 PM across the Caprock and Rolling Plains as the combination of hot temperatures; breezy, westerly winds, and very low relative humidity will result in critical fire weather conditions.
